

T&D traditional overhead conductors

2

Aluminum Conductors, Aluminum Clad Steel Reinforced (ACSR/AW)

~~Aluminium Conductor Steel Reinforced (ACSR)~~

Most trusted conductor in far-east Asia for coastline areas.

4

Aluminum Alloy Conductors, Aluminum Clad Steel Reinforced (AACSR/AW)

~~Aluminium Conductor, Aluminium Clad Steel Reinforced (ACSR/AW)~~

Excellent corrosion-resistant conductor for river crossing projects.

5

All Aluminium Alloy Conductors (AAAC)

~~Widely used conductor for substation applications.~~

Blends Strength to weight ratio with corrosion resistance

6

All Aluminium Conductors (AAC)

Widely used conductor for Substation Application
